

DEVIALET

PRESS KIT
CHRISTMAS 2023

We can close our eyes, but not our ears.

Sound gives us the power to connect with our deepest emotions. It is the voice, the music, the vibration of the air that surrounds us. It is the beating of the heart, the beat of the metronome, the breath of the artist.

Here marks Devialet's mission: to offer the possibility of a unique sound experience, one that sets the soul, the heart, and the body in motion. Under the shell of each of its products lies the infinite precision of unique proprietary technologies. Radical innovations, acoustic obsessions, cutting-edge materials: giving life to a range of beautiful and unique products whose sole purpose is to offer the luxury of perfect sound. A gift *par excellence*.

DEVIALET GEMINI II: THE JEWEL

This case contains the smallest object ever designed by Devialet, the culmination of 3 years of research and design, and 15 years of unique expertise in acoustic engineering. The second generation of Devialet Gemini earphones is a combination of the purity and precision of the Devialet sound, extremely precise proprietary technologies, and a reimagined, refined, and customizable user experience.

The perfect gift, Gemini II offers the luxury of perfectly reproduced sound, wherever you are.

PRECIOUS TECHNOLOGIES

ANC

Thanks to new adaptive noise reduction technology, by tapping on the left earbud, Devialet Gemini II creates a bubble of absolute silence around the user, adapting in real time to the sound level of the environment to compensate for it perfectly.

AWR

Thanks to the new Active Wind Reduction technology (AWR), the sound of wind no longer enters the earbuds. You can enjoy every detail hidden within every piece of music, and every phone call.

PHANTOM I: THE ICON

To reveal the sound in all its intensity, detail, and richness, Devialet has designed the perfect housing for 1,431 individual parts, developed with groundbreaking technology and extreme precision. Phantom creates the physical impact of high-fidelity sound with a power and clarity never before achieved in a speaker of its kind.

Equipped with Devialet's patented ADH® (Analog Digital Hybrid) technology, Phantom I combines the charm and clarity of analog with the power of digital to offer infinitely precise high-quality sound. Phantom I also incorporates advanced technologies SAM® (Speaker Active Matching), HBI® (Heart Bass Implosion), and ACE® (Active Cospherical Engine) for an unmatched listening experience.

This feat of complex engineering sits in contrast to the apparent simplicity of Phantom I's iconic design: Phantom I, an embodiment of Devialet's craftsmanship, sports an iconic spherical shape, enhanced by a matte finish in black or white.

Phantom I is an implosive fusion of aesthetic purity and sound performance.

DEVIALET PHANTOM THEATER: THE ULTIMATE EXPERIENCE

5, 7, or 9 Phantoms make up this custom configuration, transforming every cinematic screening into an audio experience of breathtaking scale. Thanks to Devialet's multichannel sound technology - which is compatible with Dolby Atmos format and which reproduces bass, midrange, and high frequencies to perfection - every note, every melody, every sensation is reproduced to perfection and provides an unparalleled sound immersion. Experience the luxury of a custom, powerful, and adaptable configuration.

DEVIALET OPÉRA DE PARIS: THE GIFT OF ARTISTIC CREATION

For 6 years, this exceptional partnership has brought together culture and cutting-edge technology. In addition to contributing to the spread of excellence in French culture worldwide, the partnership helps fund the artistic creation of one of France's most prestigious institutions.

From this alliance, a unique range was born, consisting of a gold-plated variation of each Devialet product, echoing the gilding of the Palais Garnier. The portable Devialet Mania speaker allows you to feel the music harmoniously blending into every corner of the room, enveloping you in a symphony of crystal-clear clarity. Devialet Dione soundbar replaces the traditional home cinema system with an exceptional immersive sound experience, without the need for additional subwoofers or satellite speakers. Combining seventeen speakers designed by Devialet, Devialet Dione offers a total immersion and stands out with its central top plate covered in 22-carat gold leaf. Experience the power of the opera in the intimacy of your living room.

ABOUT DEVIALET

Devialet is an acoustic engineering company whose mission is to deliver transformative sound through unique listening experiences. The company is rooted in a series of patented innovations embedded within their award-winning line of products, which include the Expert Pro amplifiers and connected Phantom speakers. Among many innovations, the most notable company technologies are ADH® (first pioneer patent filed in 2004), numerous acoustic and microelectronic technologies and SAM®. ADH®, for Analog Digital Hybrid technology, is Devialet's core innovation in sound amplification, combining the sophistication of analog amplification with the power and compactness of digital technology. SAM® (Speaker Active Matching) technology provides the best sound reproduction possible considering the physical properties of the speaker.

By coupling an unrivaled sound quality with a sleek and modern design, Devialet's world-class engineers are committed to provide uniquely impactful and meaningful innovations to deliver unmatched sound experiences.

Devialet has also strengthened its licensing activity portfolio alongside its first-party range, offering industrial leading partners such as Safran or BYD Group custom-made acoustic solutions that leverage the company's know-how & tech.
